## **NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

### **NOTE 1 – THE COMPANY AND BASIS OF PREPARATION.**

T. Rowe Price Group Inc. derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the T. Rowe Price U.S. mutual funds ("U.S. mutual funds"), subadvised funds, separately managed accounts, collective investment trusts, and other affiliated products. The other affiliated products include: open-ended investment products offered to investors outside the U.S., products offered through variable annuity life insurance plans in the U.S., affiliated private investment funds or private accounts, and collateralized loan obligations. We also provide certain investment advisory clients with related administrative services, including distribution, mutual fund transfer agent, accounting, and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; trust services; and non-discretionary advisory services through model delivery. Additionally, we also derive revenue from our interests in general partners of certain affiliated private investment funds that are entitled to a disproportionate allocation of income through capital allocation-based arrangements.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

On December 29, 2021, we completed our acquisition of Oak Hill Advisors, L.P., a leading alternative credit manager, and other entities that had common ownership (collectively, OHA). We acquired 100% of the equity interests of Oak Hill Advisors, L.P., 100% of the equity interests in entities that make co-investments in certain affiliated private investment funds (the "co-investment entities") and a majority of the equity interests in entities that have interests in general partners of affiliated private investment funds and are entitled to a disproportionate allocation of income (the "carried interest entities"). As of June 30, 2022, OHA had \$57 billion of capital under management (which includes net asset value, portfolio value and/or unfunded capital).

### **BASIS OF PRESENTATION.**

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. These principles require the use of estimates and reflect all adjustments that are, in the opinion of management, necessary for a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. Actual results may vary from our estimates.

The unaudited interim financial information contained in these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2021 Annual Report.

### **NEWLY ISSUED BUT NOT YET ADOPTED ACCOUNTING GUIDANCE.**

We have considered all newly issued accounting guidance that is applicable to our operations and the preparation of our unaudited condensed consolidated statements, including those we have not yet adopted. We do not believe that any such guidance has or will have a material effect on our financial position or results of operations.

### NOTE 3 – INVESTMENTS.

The carrying values of our investments that are not part of the consolidated T. Rowe Price investment products are as follows:

(in millions)	6/30/2022	12/31/2021
Investments held at fair value		
T. Rowe Price investment products		
Discretionary investments	\$ 254.2	\$ 518.7

Total	<u>\$ 2,563.7</u>	<u>\$ 2,975.5</u>

The investment partnerships are carried at fair value using net asset value (“NAV”) per share as a practical expedient. Our interests in these partnerships are generally not redeemable and are subject to significant transferability restrictions. The underlying investments of these partnerships have contractual terms through 2029, though we may receive distributions of liquidating assets over a longer term. The investment strategies of these partnerships include growth equity, buyout, venture capital, and real estate.

During the three- and six- months ended June 30, 2022, net losses on investments included \$131.2 million and \$225.5 million, respectively, of net unrealized losses related to investments held at fair value that were still held at June 30, 2022. For the same period of 2021, net gains on investments included \$49.5 million and \$88.3 million, respectively, of net unrealized gains related to investments held at fair value that were still held at June 30, 2021.

During the six months ended June 30, 2022 and 2021, certain T. Rowe Price investment products in which we provided initial seed capital at the time of formation were deconsolidated, as we no longer had a controlling interest. Depending on our ownership interest, we are now reporting our residual interests in these T. Rowe Price investment products as either an equity method investment or an investment held at fair value. Additionally, during the six months ended June 30, 2022 and June 30, 2021, certain T. Rowe Price investment products were consolidated, as we regained a controlling interest. The net impact of these changes on our unaudited condensed consolidated balance sheets and statements of income as of the dates the portfolios were deconsolidated or reconsolidated is detailed below.

(in millions)	Three months ended		Six months ended	
	6/30/2022	6/30/2021	6/30/2022	6/30/2021
Net decrease in assets of consolidated T. Rowe Price investment products	\$ (216.3)	\$ (389.2)	\$ (313.8)	\$ (1,317.3)
Net decrease in liabilities of consolidated T. Rowe Price investment products	\$ (6.4)	\$ (8.9)	\$ (15.0)	\$ (24.2)
Net decrease in redeemable non-controlling interests	\$ (155.0)	\$ (274.7)	\$ (218.1)	\$ (1,014.6)
Gains recognized upon deconsolidation	\$ 5.2	\$ —	\$	\$ 2.6

The gains recognized upon deconsolidation were the result of reclassifying currency translation adjustments accumulated on certain T. Rowe Price investment products with non-USD functional currencies from accumulated other comprehensive income to non-operating income.

#### **INVESTMENTS IN AFFILIATED COLLATERALIZED LOAN OBLIGATIONS.**

There is debt associated with our long-term investments in affiliated collateralized loan obligations (“CLOs”). As of June 30, 2022 and December 31, 2021, the debt is carried at \$102.3 million and \$113.5 million, and is reported in accounts payable and accrued expenses in our unaudited condensed consolidated balance sheets. The debt includes outstanding repurchase agreements of €66.7 million (equivalent to \$69.9 million at June 30, 2022 and \$75.9 million at December 31, 2021 at the respective EUR spot rates) and collateralized by the CLO investments. The debt also includes outstanding note facilities of €35.6 million (equivalent to \$32.4 million at June 30, 2022 and \$36.9 million at December 31, 2021 at the respective EUR spot rates) and are collateralized by first priority security interests in the assets of the consolidated OHA entity that is party to the notes. The debt bears interest at rates based on EURIBOR plus the initial margin, which equals all-in rates ranging from 1.70% to 1.95% as of June 30, 2022. The debt matures on various dates through 2032 or if the investments are paid back in full or cancelled.

#### **VARIABLE INTEREST ENTITIES.**

Our investments at June 30, 2022 and December 31, 2021 include interests in variable interest entities that we do not consolidate as we are not deemed the primary beneficiary. Our maximum risk of loss related to our involvement with these entities is as follows:

(in millions)	6/30/2022	12/31/2021
Investment carrying values	\$ 803.5	\$ 943.3
Unfunded capital commitments	101.6	94.2
Accounts receivable	88.2	145.1
	<u>\$ 993.3</u>	<u>\$ 1,182.6</u>

The unfunded capital commitments totaling \$101.6 million at June 30, 2022 and \$94.2 million at December 31, 2021 relate primarily to the affiliated private investment funds and the investment partnerships in which we have an existing investment. In addition to such amounts, a percentage of prior distributions may be called under certain circumstances.

#### **INVESTMENTS IN AFFILIATED PARTNERS.**

During 2021, as part of the OHA acquisition, we acquired a majority of the equity interests in entities that have interests in general partners of affiliated private investment funds and are entitled to a disproportionate allocation of income. These entities are considered variable interest entities and are consolidated as T. Rowe Price was determined to be the primary beneficiary.

The total assets, liabilities and non-controlling interests of these consolidated variable interest entities are as follows:

(in millions)	6/30/2022	12/31/2021
Assets	\$ 549.1	\$ 692.7
Liabilities	\$ .2	\$ 56.4
Non-controlling interest	\$ 208.8	\$ 248.7

#### NOTE 4 – FAIR VALUE MEASUREMENTS.

We determine the fair value of our cash equivalents and investments held at fair value using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. The inputs into the determination of fair value require significant management judgment or estimation. Investments in this category generally include investments for which there is not an actively-traded market.

These levels are not necessarily an indication of the risk or liquidity associated with our investments. The following table summarizes our investments and liabilities that are recognized in our unaudited condensed consolidated balance sheets using fair value measurements determined based on the differing levels of inputs. This table excludes investments held by the consolidated T. Rowe Price investment products which are presented separately on our unaudited condensed consolidated balance sheets and are detailed in Note 5.

(in millions)	6/30/2022			12/31/2021

<b>Total</b>	<b>\$ 2,842.3</b>	<b>\$ 36.7</b>	<b>\$ —</b>	<b>\$ 2,826.2</b>	<b>\$ 34.3</b>	<b>\$ —</b>
Contingent consideration liability	\$ —	\$ —	\$ 161.2	\$ —	\$ —	\$ 306.3

The fair value hierarchy level table above does not include the investment partnerships and other investments for which fair value is estimated using their NAV per share as a practical expedient. The carrying value of these investments as disclosed in Note 3 were \$99.8 million at June 30, 2022, and \$108.1 million at December 31, 2021.

As part of the purchase consideration for our acquisition of OHA in December 2021, there was contingent consideration in the amount of up to \$900.0 million, payable in cash, that may be due as part of an earnout payment starting in 2025 and ending in 2027 upon satisfying or exceeding certain defined revenue targets. These defined revenue targets will be evaluated on a cumulative basis beginning at the end of 2024, with the ability to extend two additional years if the defined revenue targets are not achieved. About 22% of the earnout is conditioned upon continued service with T. Rowe Price and was excluded from the purchase consideration and deemed compensatory. The fair value of the earnout deemed compensatory is remeasured each reporting period and recognized over the related service period. For the three- and six- months ended June 30, 2022, \$3.7 million and \$8.8 million, respectively, was recorded as part of compensation expense in our unaudited condensed consolidated statements of income for the portion of the earnout deemed compensatory.

The change in the contingent consideration liability measured at fair value for which we used Level 3 inputs to determine fair value is as follows:

(in millions)	Contingent Consideration Liability		
		Three Months Ended 6/30/2022	Six Months Ended 6/30/2022
Balance at beginning of period	\$	211.5	\$ 306.3
Measurement period adjustment		—	(49.3)
Unrealized (gains) losses, included in earnings		(50.3)	(95.8)
Balance, June 30, 2022	\$	161.2	\$ 161.2

The fair value of the contingent consideration is measured using the Monte Carlo simulation methodology of valuation. The most significant assumptions used relate to the discount rates and from changes pertaining to the achievement of the defined financial targets. The unrealized (gains) losses during the quarter are reflected in general, administrative and other expenses in our unaudited condensed consolidated statements of income.

In addition, simultaneously with the OHA acquisition, a Value Creation Agreement was entered into whereby certain employees of OHA will receive incentive payments in the aggregate equal to 10% of the appreciated value of the OHA business, subject to an annualized preferred return to T. Rowe Price, on the fifth anniversary of the acquisition date. This arrangement is treated as a post-combination compensation expense. This arrangement will be remeasured at fair value at each reporting date and recognized over the related service period. For the three- and six- months ended June 30, 2022, \$2.7 million and \$4.7 million was recognized as part of compensation expense in our unaudited condensed consolidated statements of income.

#### NOTE 5 – CONSOLIDATED T. ROWE PRICE INVESTMENT PRODUCTS AND OTHER ENTITIES.

The T. Rowe Price investment products that we consolidate in our unaudited condensed consolidated financial statements are generally those products we provided initial seed capital at the time of their formation and have a controlling interest. Our U.S. mutual funds are considered voting interest entities, while those regulated outside the U.S. are considered variable interest entities.

The following table details the net assets of the consolidated T. Rowe Price investment products:

<sup>(1)</sup> Cash and cash equivalents includes \$2.8 million at June 30, 2022, and \$6.5 million at December 31, 2021, of T. Rowe Price money market mutual funds.

<sup>(2)</sup> Investments include \$9.4 million at June 30, 2022, and \$42.5 million at December 31, 2021 of other T. Rowe Price investment products.

Although we can redeem our net interest in these consolidated T. Rowe Price investment products at any time, we cannot directly access or sell the assets held by these products to obtain cash for general operations. Additionally, the assets of these investment products are not available to our general creditors.

Since third party investors in these investment products have no recourse to our credit, our overall risk related to the net assets of consolidated T. Rowe Price investment products is limited to valuation changes associated with our net interest. We, however, are required to recognize the valuation changes associated with all underlying investments held by these products in our unaudited condensed consolidated statements of income and disclose the portion attributable to third party investors as net income attributable to redeemable non-controlling interests.

The operating results of the consolidated T. Rowe Price investment products for the three- and six- months ended June 30, 2022 and 2021, are reflected in our unaudited condensed consolidated statements of income as follows:

The operating expenses of the consolidated investment products are reflected in general, administrative and other expenses. In preparing our unaudited condensed consolidated financial statements, we eliminated operating expenses of \$0.6 million and \$1.1 million for the three months ended June 30, 2022 and 2021, respectively, against the investment advisory and administrative fees earned from these products. Operating expenses eliminated for the six months ended June 30, 2022 and 2021, were \$1.5 million and \$2.4 million, respectively. The net investment income (loss) reflected in non-operating income (loss) includes dividend and interest income as well as realized and unrealized gains and losses on the underlying securities held by the consolidated T. Rowe Price investment products.

The table below details the impact of these consolidated investment products on the individual lines of our unaudited condensed consolidated statements of cash flows for the six months ended June 30, 2022 and 2021.

The net cash provided by financing activities during the six months ended June 30, 2022 and 2021 includes \$26.9 million and \$80.2 million, respectively, of net subscriptions we made into the consolidated T. Rowe Price investment products, net of dividends received. These cash flows were eliminated in consolidation.

### FAIR VALUE MEASUREMENTS.

We determine the fair value of investments held by consolidated T. Rowe Price investment products using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. The value of investments using Level 3 inputs is insignificant.

These levels are not necessarily an indication of the risk or liquidity associated with these investment holdings. The following table summarizes the investment holdings held by our consolidated T. Rowe Price investment products using fair value measurements determined based on the differing levels of inputs.

## **NOTE 9 – EARNINGS PER SHARE CALCULATIONS.**

The following table presents the reconciliation of net income attributable to T. Rowe Price to net income allocated to our common stockholders and the weighted-average shares that are used in calculating the basic and diluted earnings per share on our common stock. Weighted-average common shares outstanding assuming dilution reflects the potential dilution, determined using the treasury stock method, that could occur if outstanding stock options were exercised and non-participating stock awards vested. No outstanding stock options had an anti-dilutive impact on the diluted earnings per common share calculation in the periods presented.

**NOTE 11 – COMMITMENTS AND CONTINGENCIES.**

**COMMITMENTS.**

T. Rowe Price has committed \$493.3 million to fund OHA products over the next five years.

**CONTINGENCIES.**

On February 14, 2017, T. Rowe Price Group, Inc., T. Rowe Price Associates, Inc., T. Rowe Price Trust Company, current and former members of the management committee, and trustees of the T. Rowe Price U.S. Retirement Program were named as defendants in a lawsuit filed in the United States District Court for the District of Maryland (the "Court"). The lawsuit alleges breaches of ERISA's fiduciary duty and prohibited transaction provisions on behalf of a class of all participants and beneficiaries of the T. Rowe Price 401(k) Plan from February 14, 2011, to the time of judgment. The matter has been certified as a class action. Subsequently, the parties reached a settlement agreement, and on July 6, 2022, the Court issued an order approving the settlement and dismissed the case with prejudice. The settlement is not material to T. Rowe Price Group, Inc.

In addition to the matter discussed above, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood of an adverse determination in one or more of these pending ordinary course of business claims that would have a material adverse effect on our financial position or results of operations is remote.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors  
T. Rowe Price Group, Inc.:

### *Results of Review of Interim Financial Information*

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries (the "Company") as of June 30, 2022, the related condensed consolidated statements of income, comprehensive income, stockholders' equity for the three-month and six-month periods ended June 30, 2022 and 2021, the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2022 and 2021, and the related notes (collectively, the consolidated interim financial information). Based on our reviews, we are not aware of any material modifications that should be made to the consolidated interim financial information for it to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheet of the Company as of December 31, 2021, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 24, 2022, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2021, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

### *Basis for Review Results*

This consolidated interim financial information is the responsibility of the Company's management. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our reviews in accordance with the standards of the PCAOB. A review of consolidated interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

### **OVERVIEW.**

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in U.S. mutual funds, subadvised funds, separately managed accounts, collective investment trusts, and other affiliated products. The other affiliated products include: open-ended investment products offered to investors outside the U.S., products offered through variable annuity life insurance plans in the U.S., affiliated private investment funds or private accounts, and collateralized loan obligations. We also provide certain investment advisory clients with related administrative services, including distribution, mutual fund transfer agent, accounting, and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; trust services; and non-discretionary advisory services through model delivery. Additionally, we also derive revenue from our interests in general partners of certain affiliated private investment funds that are entitled to a disproportionate allocation of income through capital allocation-based arrangements also known as carried interest.

We manage a broad range of U.S., international and global stock, bond, money market mutual funds, collective investment trusts and other investment products as well as affiliated private investment funds or private accounts, and collateralized loan obligations, which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management affect our revenues and results of operations.

We incur significant expenditures to develop new products and services and improve and expand our capabilities and distribution channels in order to attract new investment advisory clients and additional investments from our existing clients. These efforts often involve costs that precede any future revenues that we may recognize from an increase to our assets under management.

The general trend to passive investing has been persistent and accelerated in recent years, which has negatively impacted our new client inflows. However, over the long term we expect well-executed active management to play an important role for investors. In this regard, we have ample liquidity and resources that allow us to take advantage of attractive growth opportunities. We are investing in key capabilities, including investment professionals, distribution professionals, technologies, and new product offerings in order to provide our clients with strong investment management expertise and service.

On December 29, 2021, we completed our acquisition of Oak Hill Advisors, L.P., a leading alternative credit manager, and other entities that had common ownership (collectively, "OHA"). We acquired 100% of the equity interests of Oak Hill Advisors, L.P., 100% of the equity interests in entities that make co-investments in certain affiliated private investment funds (the "co-investment entities") and a majority of the equity interests in entities that have interests in general partners of affiliated private investment funds and are entitled to a disproportionate allocation of income (the "carried interest entities"). As of June 30, 2022, OHA had \$57 billion of capital under management (which includes net asset value, portfolio value and/or unfunded capital).

### **MARKET TRENDS.**

Major U.S. stock indexes declined considerably in the second quarter of 2022, adding to first-quarter losses and capping the S&P 500 Index's worst first half of a calendar year in decades. As measured by various Russell indexes, growth stocks fared worse than value stocks across all market capitalizations. Investors continued to shun riskier assets in response to Russia's invasion of Ukraine, elevated inflation exacerbated by rising commodity prices, and a more aggressive pace of Federal Reserve interest rate increases following its raising of the fed funds target rate in mid-March. Investors were also concerned about inflation's impact on consumer spending and corporate profits, particularly as some high-profile companies and major retailers disappointed with their financial results or projections.

Developed European markets fell broadly in U.S. dollar terms, as the European Central Bank prepared to begin raising short-term interest rates in July. Stocks in Sweden fared worst, dropping 21%, while shares in the Netherlands and Ireland fell about 19%. Shares in the UK held up relatively well, falling about 10%, as currency weakness helped support multinational companies with overseas earnings. Most developed markets in Asia fell sharply, but shares in Hong Kong held up very well, falling only about 1%.

In emerging Asia, several markets fell sharply in dollar terms. Chinese shares rose, however, helped by an easing of coronavirus lockdown measures in parts of the country. In emerging Europe, shares in Poland and Hungary plunged 27% and 26%, respectively, hurt by their close proximity to the Russian-Ukrainian conflict. In Latin America, markets in Chile and Mexico fell about 15%, while stocks in Peru plunged 30%.

Returns of several major equity market indexes were as follows:

Index	Three months ended	Six months ended
	6/30/2022	6/30/2022
S&P 500 Index	(16.1)%	(20.0)%
NASDAQ Composite Index <sup>(1)</sup>	(22.4)%	(29.5)%

MSCI EAFE (Europe, Australasia, and Far East) Index	(14.3)%	(19.3)%
MSCI Emerging Markets Index	(11.3)%	(17.5)%

<sup>(1)</sup> Returns exclude dividends

Global bond prices declined in the second quarter of 2022, extending first-quarter losses, as interest rates rose in many countries due to elevated inflation. In the U.S., Treasury yields rose and the Federal Reserve increased official short-term interest rates twice. The fed funds target rate range at the end of June was 1.50% to 1.75%. The 10-year U.S. Treasury note yield increased from 2.32% to 2.98% during the quarter.

In the taxable investment-grade universe, corporate bonds fared worst as interest rates rose and credit spreads widened amid concerns about the economy and corporate earnings. Treasury and mortgage-backed securities also declined materially. Tax-free municipal bonds declined but outperformed the taxable bond market. High yield bonds performed poorly as credit spreads widened and investors were concerned about weaker corporate earnings and a possible recession.

Bonds in developed non-U.S. markets tumbled, as interest rates in many developed countries increased, and losses to U.S. investors were exacerbated by a stronger U.S. dollar. The British pound and the euro declined approximately 8% and 6%, respectively, versus the dollar. The Japanese yen fell more than 10%—to levels not seen in more than two decades—as Japanese monetary policy remained stimulative and diverged from the tightening stances adopted by many other central banks.

Emerging markets bonds declined as investors were risk averse and as central banks in emerging countries raised interest rates to fight inflation and defend weakening currencies. Most emerging markets currencies depreciated versus the dollar.

Returns for several major bond market indexes were as follows:

	6/30/2022	6/30/2022
Bloomberg U.S. Aggregate Bond Index	(4.7)%	(10.4)%
JPMorgan Global High Yield Index	(9.3)%	(13.4)%

## ASSETS UNDER MANAGEMENT<sup>(1)</sup>

Assets under management ended the second quarter of 2022 at \$1,309.7 billion, a decrease of \$242.1 billion from March 31, 2022 and \$378.1 billion from the end of 2021. The Q2 decrease in assets under management was driven by market depreciation, including net distributions not reinvested, of \$227.4 billion and net cash outflows of \$14.7 billion. Clients transferred \$2.9 billion in net assets from the U.S. mutual funds primarily to collective investment trusts and other investment products, of which \$1.6 billion transferred into the retirement date trusts.

For the six months ended June 30, 2022, the decrease in assets under management was driven by market depreciation, including net distributions not reinvested, of \$358.1 billion and net cash outflows of \$20.0 billion. Clients transferred \$7.0 billion in net assets from the U.S. mutual funds primarily to collective investment trusts and other investment products, of which \$4.9 billion transferred into the retirement date trusts.

We also provide strategic investment advice solutions for certain portfolios. These advice solutions, which the vast majority is overseen by our multi-asset division, may include strategic asset allocation, and in certain portfolios, asset selection and/or tactical asset allocation overlays. We also offer advice solutions through retail separately managed accounts and separately managed accounts model delivery. As of June 30, 2022, total assets in these solutions were \$405 billion, of which \$398 billion are included in our reported assets under management in the tables above.

We provide participant accounting and plan administration for defined contribution retirement plans that invest in the firm's U.S. mutual funds, collective investment trusts and funds outside of the firm's complex. As of June 30, 2022, our assets under administration were \$216 billion, of which nearly \$133 billion are assets we manage.

### **INVESTMENT PERFORMANCE.**<sup>(1)</sup>

Strong investment performance and brand awareness is a key driver to attracting and retaining assets—and to our long-term success. <sup>(6)</sup> The Morningstar Rating™ for funds is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. Morningstar gives its best ratings of 5 or 4 stars to the top 32.5% of all funds (of the 32.5%, 10% get 5 stars and 22.5% get 4 stars). The Overall Morningstar Rating™ is derived from a weighted average of the performance figures associated with a fund's 3, 5, and 10 year (if applicable) Morningstar Rating™ metrics.

## RESULTS OF OPERATIONS.

The following table and discussion sets forth information regarding our consolidated financial results for the three and six months ended June 30, 2022 and 2021 on a U.S. GAAP basis as well as a non-GAAP basis. The 2022 periods reflect the operating results of OHA, which was acquired at the end of 2021. The non-GAAP basis adjusts for the impact of our consolidated T. Rowe Price investment products, the impact of market movements on the supplemental savings plan liability and related economic hedges, investment income related to certain other investments, acquisition-related amortization and costs, and certain nonrecurring charges and gains.

## Results Overview - Quarter ended June 30, 2022

**Net revenues** consist of investment advisory revenues; administrative, distribution, and servicing fees; and capital allocation-based income. Total net revenues were \$1,513.0 million in the second quarter of 2022 compared with \$1,929.3 million in the second quarter of 2021.

Investment advisory fees are generally earned based on the value and composition of our assets under management, which change based on fluctuations in financial markets and net cash flows. As our average assets under management increase or decrease in a given period, the level of our investment advisory fee revenue for that same period generally fluctuates in a similar manner. Our annualized effective fee rates can be impacted by market or cash flow related shifts among asset and share classes, price changes in existing products, and asset level changes in products with tiered-fee structures.

Capital allocation income will fluctuate quarter-to-quarter to reflect the adjustment made to accrued carried interest for the change in value of the affiliated funds as if the funds' underlying investments were realized as of June 30, 2022, regardless of whether the funds' underlying investments have been realized.

**Operating expenses** on a U.S. GAAP basis were \$844.4 million in the second quarter of 2022 compared with \$971.2 million in the second quarter of 2021. On a non-GAAP basis, operating expenses were \$947.3 million, a 1.7% increase over the comparable 2021 period. Our non-GAAP operating expenses exclude the impact of the supplemental savings plan, consolidated sponsored products, the remeasurement of the contingent consideration liability, amortization of certain acquisition-related assets, and other acquisition-related costs. See our non-GAAP reconciliations later in this Management's Discussion and Analysis section. Our operating expenses in the second quarter of 2022 include OHA's operating expenses as a result of the acquisition at the end of 2021. OHA's operating

expenses primarily impact compensation expense; technology, occupancy, and facility costs; and general, administrative and other costs.

The increase in our non-GAAP operating expenses was primarily attributable to higher salaries and benefits, the addition of OHA operating expenses, and higher costs related to the ongoing investment in the firm's technology capabilities. These increases were mostly offset by lower distribution and servicing costs due to lower average assets under management. The second quarter of 2022 non-GAAP operating expenses includes compensation-related expenses associated with capital allocation-based income.

Operating margin in the second quarter of 2022 was 44.2%, compared to 49.7% earned in the 2021 quarter. The decrease in our operating margin for the second quarter of 2022 compared to the 2021 period was primarily driven by larger decreases in net revenues, primarily investment advisory fee revenue, as compared to the decreases in operating expenses, primarily due to the decrease in the supplemental savings plan liability, in the second quarter of 2022. Further, the impacts of capital allocation-based income and carried interest-related compensation are reflected in the operating margin for the second quarter of 2022.

Diluted earnings per share was \$1.46 for the second quarter of 2022 as compared to \$3.46 for the second quarter of 2021. The decrease was primarily driven by lower operating income and by net investment losses recognized in the second quarter of 2022 as compared to net investment gains in the second quarter of 2021, as market performance in the second quarter of 2022 was outpaced by the strong market returns in 2021.

On a non-GAAP basis, diluted earnings per share was \$1.79 for the second quarter of 2022 as compared to \$3.31 for the second quarter of 2021. Similar to our U.S. GAAP diluted earnings, the decrease is largely attributable to lower operating income compared to the 2021 period and net investment losses on our cash investment strategy recognized in the second quarter of 2022 as compared to net investment gains in the second quarter of 2021.

### **Results Overview - Year-to-Date ended June 30, 2022**

Net revenues consist of investment advisory revenues; administrative, distribution, and servicing fees; and capital allocation-based income. Total net revenues were \$3,376.0 million in the six months ended June 30, 2022 compared with \$3,756.1 million in the six months ended June 30, 2021.

Operating expenses were \$1,830.0 million in the six months ended June 30, 2022 compared with \$1,904.8 million in the 2021 period. On a non-GAAP basis, our operating expenses for the six months ended June 30, 2022 increased 7.9% to \$1,986.4 million compared to the 2021 period. Our non-GAAP operating expenses exclude the impact of the supplemental savings plan, consolidated sponsored products, the remeasurement of the contingent consideration liability, amortization of certain acquisition-related assets, and other acquisition-related costs. See our non-GAAP reconciliations later in this Management's Discussion and Analysis section. Our operating expenses for the six months ended June 30, 2022 include OHA's operating expenses as a result of the acquisition at the end of 2021. OHA's operating expenses primarily impact compensation expense; technology, occupancy, and facility costs; and general, administrative and other costs.

The increase in our non-GAAP operating expenses for the six months ended June 30, 2022 compared with the 2021 period was primarily due to higher compensation expenses, including increased salaries and benefits. The addition of OHA operating expenses and higher technology and facility costs also contributed to the increase. These increases were partially offset by lower distribution and servicing costs due to lower average assets under management.

We updated our forecasted 2022 non-GAAP operating expenses from a range of 10% to 14% to a range of 4% to 7% to reflect lower market-related expenses and a slower pace of hiring. The addition of a full-year of OHA's operating expenses, since the acquisition at end of 2021, is driving most of the 2022 forecasted expense growth. We could elect to further adjust our expense growth should unforeseen circumstances arise, including significant market movements.

Operating margin in the six months ended June 30, 2022 was 45.8%, compared to 49.3% earned in the 2021 period. The decrease in our operating margin for the six months ended June 30, 2022 compared to the 2021 period was primarily driven by larger decreases in net revenues, primarily investment advisory fee revenue, as compared to the decreases in operating expenses, primarily the decrease in the supplemental savings plan liability, for the six

months ended June 30, 2022. Further, the impacts of capital allocation-based income and carried interest-related compensation are reflected in the operating margin for the six months ended June 30, 2022.

Diluted earnings per share was \$3.88 for the six months ended June 30, 2022 as compared to \$6.63 for the six months ended June 30, 2021. The 41.5% decrease was primarily driven by net investment losses recognized in the six months ended June 30, 2022 as compared to net investment gains in the six months ended June 30, 2021, as the market performance in the second quarter of 2022 was outpaced by the strong market returns in 2021, and by lower operating income.

On a non-GAAP basis, diluted earnings per share was \$4.42 for the six months ended June 30, 2022 as compared to \$6.32 for the 2021 period. The decrease in adjusted diluted earnings per share was primarily due to lower operating income compared to 2021 period and net investment losses on our cash investment strategy recognized in the six months ended June 30, 2022 as compared to net investment gains in the six months ended June 30, 2021. See our non-GAAP reconciliations later in this Management's Discussion and Analysis section.

## Investment advisory fees

Investment advisory revenues earned in the second quarter of 2022 decreased over the comparable 2021 quarter as average assets under management decreased \$178.2 billion, or 11.2%, to \$1,407.1 billion. For the six months ended June 30, 2022, investment advisory revenues decreased over the comparable 2021 period as average assets under management decreased \$64.1 billion, or 4.1%, to \$1,483.0 billion.

In the second quarter of 2022, we did not waive a significant level of money market investment advisory fees. For the six months ended June 30, 2022, we voluntarily waived \$9.3 million, or less than 1%, of our investment advisory fees. At June 30, 2022, combined net assets of the investment portfolios in which we waived fees for the six months ended June 30, 2022 were \$23.6 billion. For the six months ended June 30, 2021, we waived money market investment advisory fees of \$29.3 million.

The total average annualized effective fee rate earned during the second quarter of 2022 was 42.7 basis points, compared with 45.2 basis points earned during the second quarter of 2021 and 43.2 basis points earned during the first quarter of 2022. The total average annualized effective fee rate earned during the six months ended June 30, 2022 was 43.0 basis points, compared with 45.3 basis points during the six months ended June 30, 2021. The total average annualized effective fee rate has declined in comparison to the first quarter of 2022 and the second quarter and year-to-date periods of 2021 due to transfers to lower fee vehicles and an asset class mix shift to lower fee strategies due to market volatility, offset slightly by a reduction in money market fee waivers. Further, in comparison to second quarter and year-to-date period of 2021, the annualized effective fee rate was also impacted by the July 2021 target date fee reductions, partially offset by a higher-than-average effective fee rate earned on the firm's alternative asset class.

### U.S. mutual funds

Investment advisory revenues earned in the second quarter of 2022 from our U.S. mutual funds were \$876.2 million, a decrease of 20.2% from the comparable 2021 quarter. Average assets under management in these funds for the second quarter of 2022 decreased 16.2% from the 2021 quarter to \$711.1 billion. The annualized effective fee rate of 49.4 basis points for the second quarter of 2022 decreased from 51.9 basis points in the second quarter 2021 primarily due to the July 2021 fee reductions in our target-date products and a shift in assets to lower fee asset classes within the complex over the last twelve months.

For the six months ended June 30, 2022, investment advisory revenues earned from the firm's U.S. mutual funds were \$1,852.7 million, a decrease of 13.7% from the 2021 period. Average assets under management in these funds for the six months ended June 30, 2022 decreased 9.3% from the 2021 period to \$754.3 billion. The annualized effective fee rate of 49.5 basis points for the six months ended June 30, 2022 decreased from 52.1 basis points in the six months ended June 30, 2021, primarily due to the July 2021 fee reductions in our target-date products and a shift in assets to lower fee asset classes within the complex over the last twelve months.

### Subadvised funds, separate accounts, collective investment trusts and other investment products (other portfolios)

Investment advisory revenues earned in the second quarter of 2022 from these other portfolios were \$620.5 million, a decrease of 10.0% from the comparable 2021 quarter. Average assets under management for these products decreased 5.6% from the 2021 quarter to \$696.0 billion. Investment advisory revenues and average assets under management in Q2 2022 reflect OHA's revenue and related average assets under management. The annualized effective fee rate of 35.8 basis points for the second quarter of 2022 decreased from 37.5 basis points in the second quarter of 2021. The decrease was primarily due to the July 2021 fee reductions in our target-date products and a shift in assets to lower fee vehicles and asset classes within the complex over the last twelve months. These fee pressures were partially offset by the higher-than-average fee rate earned on our alternative asset class.

For the six months ended June 30, 2022, investment advisory revenues earned from subadvised and separate accounts, as well as collective investment trusts and other investment products, were \$1,306.1 million, a decrease of 1.6% from the 2021 period. Average assets under management for these products increased 1.8% from the 2021 period to \$728.7 billion. The annualized effective fee rate of 36.1 basis points for the six months ended June 30, 2022 decreased from 37.4 basis points for the six months ended June 30, 2021. Our annualized effective fee rate for our other portfolios decreased primarily due to the July 2021 fee reductions in our target-date products and a shift in assets to lower fee vehicles and asset classes within the complex over the last twelve months. These fee pressures were partially offset by the higher-than-average fee rate earned on our alternative asset class.

Administrative, distribution, and servicing fees in the second quarter of 2022 were \$142.6 million, an increase of \$.5 million, or .4%, from the comparable 2021 quarter. For the six months ended June 30, 2022, these fees were \$299.1 million, an increase of \$18.0 million, or 6.4%, from the 2021 period. The increase in both periods was primarily due to higher transfer agent servicing activities provided to the T. Rowe Price mutual funds for retail shareholders and higher trustee services revenue. These increases were partially offset by lower 12b-1 revenue earned primarily on the Advisor and R share classes of the U.S. mutual funds as a result of lower assets under management in these share classes. The decrease in 12b-1 revenue is offset entirely by a decrease in the costs paid to third-party intermediaries that source these assets and are reported in distribution and servicing expense.

Capital allocation-based income in the second quarter of 2022 reduced net revenues by \$126.3 million. The second quarter of 2022 amount represents \$113.0 million in market-related reductions of accrued carried interest from investments in affiliated private investment funds and \$13.3 million in non-cash amortization associated with the difference in the closing date fair value and carrying value of investments acquired as part of the OHA acquisition.

For the six months ended June 30, 2022, capital allocation-based income reduced net revenues by \$81.9 million. The six months ended June 30, 2022 amount represents \$55.4 million in market-related reductions of accrued carried interest from investments in affiliated private investment funds and \$26.5 million in non-cash amortization associated with the difference in the closing date fair value and carrying value of investments acquired as part of the OHA acquisition.

Our net revenues reflect the elimination of advisory and administrative fee revenue earned from our consolidated T. Rowe Price investment products. The corresponding expenses recognized by these products, and consolidated in our financial statements, were also eliminated from operating expenses. For the second quarter, we eliminated

net revenue of \$ .6 million in 2022 and \$1.1 million in 2021. For the six months ended June 30, we eliminated net revenue of \$1.5 million in 2022 and \$2.4 million in 2021.

<sup>(1)</sup> The impact of the market on the supplemental savings plan liability drives the expense recognized each period.

Compensation and related costs, excluding non-cash amortization of certain acquisition-related retention arrangements and supplemental savings plan were \$544.6 million in the second quarter of 2022, a decrease of \$21.5 million, or 3.8%, compared to the 2021 quarter. For the six months ended June 30, 2022, these costs were \$1,163.6 million, an increase of \$36.2 million, or 3.2%, compared to the 2021 period. Both the second quarter and six months ended June 30, 2022 periods include OHA's compensation and related costs and carried interest-related compensation. Further, both the second quarter and six months ended June 30, 2022 periods were impacted by a lower interim bonus accrual and an increase in salaries and benefits. The firm employed 7,771 associates at June 30, 2022, an increase of 3.2% from the end of 2021.

Distribution and servicing costs were \$75.7 million for the second quarter of 2022, a decrease of 18.3% from the \$92.7 million recognized in the 2021 quarter. For the six months ended June 30, 2022, these costs were \$161.6 million, a decrease of 9.4% over the \$178.3 million recognized in the comparable 2021 period. The decrease in both periods was primarily driven by lower average assets under management in certain share classes of the U.S. mutual funds that earn 12(b)-1 fees. Additionally, lower AUM in our international products, including our Japanese Investment Trusts (ITMs), and certain SICAV share classes contributed to lower distribution costs.

The costs in this expense category primarily include amounts paid to third-party intermediaries that source the assets of certain share classes of our U.S. mutual funds and our international products, such as our Japanese ITMs and SICAVs. These costs are offset entirely by the revenue we earn and report in net revenues: 12b-1 revenue recognized in administrative, distribution, and servicing fees for the Advisor and R share classes of the U.S. mutual funds and investment advisory fee revenue for our international products.

Advertising and promotion costs were \$21.4 million in the second quarter of 2022, an increase of \$1.0 million, or 4.9%, compared to the \$20.4 million recognized in the 2021 quarter. For the six months ended June 30, 2022, these costs were \$44.8 million, an increase of \$5.5 million, or 14.0%, compared to the 2021 period. The increase in both periods was driven primarily by an increase in sponsorships and promotion-related costs. Increased media spend also contributed to the higher advertising and promotion costs for the six months ended June 30, 2022 as compared to the six months ended June 30, 2021.

Product and recordkeeping related costs were \$76.3 million in the second quarter of 2022, an increase of \$33.0 million, or 76.2%, compared to the \$43.3 million in the 2021 quarter. For the six months ended June 30, 2022, these costs were \$156.7 million, an increase of \$72.4 million, or 85.9%, compared to the 2021 period. Substantially all of

the increase in both the second quarter and year to date 2022 was driven by the recordkeeping costs incurred as part of our expanded relationship with Fidelity National Information Services, Inc. ("FIS") that began in August 2021. The costs incurred from the FIS arrangement were partially offset by a reduction in compensation expenses as a result of the approximately 800 associates who transitioned to FIS in August 2021.

Technology, occupancy, and facility costs were \$134.3 million in the second quarter of 2022, an increase of \$15.0 million, or 12.6%, compared to the \$119.3 million recognized in the 2021 quarter. For the six months ended June 30, 2022, these costs were \$268.2 million, an increase of \$31.6 million, or 13.4%, compared to the 2021 period. The increase in both periods was primarily due to the ongoing investment in our technology capabilities, including hosted solution licenses, depreciation, and increased office facility costs.

General, administrative, and other expenses were \$73.3 million in the second quarter of 2022, a decrease of \$18.4 million, or 20.1%, compared to the \$91.7 million recognized in the 2021 quarter. The decrease was primarily related to the favorable impact of the change in fair value of the contingent consideration liability of \$50.3 million, partially offset by \$27.2 million in acquisition-related amortization and other acquisition-related costs. Higher travel, information services and other nonrecurring administrative costs further offset the decrease in general, administrative and other expenses in the second quarter of 2022 compared to 2021.

For the six months ended June 30, 2022, these costs were \$153.7 million, a decrease of \$25.3 million, or 14.1%, compared to the 2021 period. The decrease was primarily related to the favorable impact of the change in fair value of the contingent consideration liability of \$95.8 million and lower legal fees. This decrease was partially offset by \$54.3 million in acquisition-related amortization and other acquisition-related costs as well as higher travel, information services and other nonrecurring administrative costs.

### **Non-operating income (loss)**

Non-operating loss for the second quarter of 2022 was \$279.9 million as compared to non-operating income of \$143.9 million in the 2021 quarter. For the six months ended June 30, 2022, non-operating loss was \$478.4 million, a decrease of \$724.4 million from non-operating income of \$246.0 million in the comparable 2021 period. The following table details the components of non-operating income (loss) for both the second quarter and six months ended June 30, 2022 and 2021.

The significant investment portfolio gains in both the second quarter and six months ended June 30, 2021 outperformed the investment portfolio losses in both the second quarter and six months ended June 30, 2022 as the

continued Russian invasion of Ukraine, elevated inflation and a more aggressive pace of the Federal Reserve interest rate increases heavily influenced the global economy and markets resulting in further lower valuations at the end of the second quarter 2022. The cash and discretionary investment portfolio also experienced net investment losses of \$30.6 million during the second quarter of 2022 and \$54.4 million during the six months ended June 30, 2022.

The table above includes the net investment income of the underlying portfolios included in the consolidated T. Rowe Price investment products and not just the net investment income related to our interest. The table below shows the impact that the consolidated T. Rowe Price investment products had on the individual lines of our unaudited condensed consolidated statements of income and the portion attributable to our interest:

### Provision for income taxes

The following table reconciles the statutory federal income tax rate to our effective tax rate on a U.S. GAAP basis for both the three- and six-months ended June 30, 2022 and 2021:

	Three months ended		Six months ended	
	6/30/2022	6/30/2021	6/30/2022	6/30/2021
Statutory U.S. federal income tax rate	21.0 %	21.0 %	21.0 %	21.0 %
State income taxes for current year, net of federal income tax benefits <sup>(1)</sup>	3.9	3.7	3.5	3.7
Net (income) losses attributable to redeemable non-controlling interests	2.7	(.1)	1.1	(.3)
Net excess tax benefits from stock-based compensation plans activity	(.5)	(.6)	(.5)	(.9)
Other items	(1.1)	(.5)	(.2)	(.1)
Effective income tax rate	<u>26.0 %</u>	<u>23.5 %</u>	<u>24.9 %</u>	<u>23.4 %</u>

<sup>(1)</sup> State income tax benefits are reflected in the total benefits for net income attributable to redeemable non-controlling interests and stock-based compensation plans activity.

Our U.S. GAAP effective tax rate for the second quarter of 2022 was 26.0%, compared with 23.5% in the 2021 quarter. For the six months ended June 30, 2022, our U.S. GAAP effective tax rate was 24.9%, compared with 23.4% in the 2021 period. The increase in the U.S. GAAP effective tax rate in 2022 from 2021 was primarily due to net losses attributable to redeemable non-controlling interests held in our consolidated investment products and lower discrete tax benefits associated with the settlement of stock-based awards. These increases were partially offset by the favorable impacts of the reduction in the effective state tax rate due to the full phase-in of the 2018 Maryland state tax legislation and the remeasurement of the contingent consideration liability.

The non-GAAP tax rate primarily adjusts for the impact of the consolidated investment products, including the net income attributable to the redeemable non-controlling interests. Our non-GAAP effective tax rate was 23.9% in the second quarter of 2022 compared with 23.4% in second quarter of 2021 and 24.1% for the six months ended June 30, 2022 compared to 23.5% in the 2021 period. The increase in the non-GAAP effective tax rate was primarily attributable to lower discrete tax benefits associated with the settlement of stock-based awards compared to the

second quarter of 2021. The non-GAAP effective tax rate for the six months ended June 30, 2022 continues to be favorably impacted by the complete phase-in benefit of the 2018 Maryland state tax legislation.

Our effective tax rate will continue to experience volatility in future periods as the tax benefits recognized from stock-based compensation are impacted by market fluctuations in our stock price and timing of option exercises as well as the remeasurement of the contingent consideration liability. Our U.S. GAAP rate will also be impacted by changes in the proportion of net income that is attributable to our redeemable non-controlling interests and non-controlling interests reflected in permanent equity.

We currently estimate that our effective tax rate for the full year 2022, on a U.S. GAAP basis, will be in the range of 23% to 26%. On a non-GAAP basis, the range is 23% to 25%.

### **NON-GAAP INFORMATION AND RECONCILIATION.**

We believe the non-GAAP financial measures below provide relevant and meaningful information to investors about our core operating results. These measures have been established in order to increase transparency for the purpose of evaluating our core business, for comparing current results with prior period results, and to enable more appropriate comparison with industry peers. However, non-GAAP financial measures should not be considered a substitute for financial measures calculated in accordance with U.S. GAAP and may be calculated differently by other companies.

The following schedules reconcile certain U.S. GAAP financial measures for the three months ended June 30, 2022 and 2021.

- (1) These non-GAAP adjustments remove the impact of acquisition-related amortization and costs including amortization of intangible assets, the recurring fair value remeasurements of the contingent consideration liability, amortization of acquired investment and non-controlling interest basis differences and amortization of compensation-related arrangements. Management believes adjusting for these charges helps the reader's ability to understand our core operating results and to increase comparability period to period.
- (2) This non-GAAP adjustment removes the transactions costs incurred related to the acquisition of OHA. Management believes adjusting for these charges helps the reader's ability to understand our core operating results and to increase comparability period to period.
- (3) This non-GAAP adjustment removes the compensation expense impact from market valuation changes in the supplemental savings plan liability and the related net gains (losses) on investments designated as an economic hedge against the related liability. Amounts deferred under the supplemental savings plan are adjusted for appreciation (depreciation) of hypothetical investments chosen by participants. We use T. Rowe Price investment products to economically hedge the exposure to these market movements. Management believes it is useful to offset the non-operating investment income (loss) realized on the economic hedges against the related compensation expense and remove the net impact to help the reader's ability to understand our core operating results and to increase comparability period to period.
- (4) These non-GAAP adjustments remove the impact that the consolidated T. Rowe Price investment products have on our U.S. GAAP consolidated statements of income. Specifically, we add back the operating expenses and subtracts the investment income of the consolidated T. Rowe Price investment products. The adjustment to operating expenses represents the operating expenses of the consolidated products, net of the elimination of related management and administrative fees. The adjustment to net income attributable to T. Rowe Price represents the net income of the consolidated products, net of redeemable non-controlling interests. Management believes the consolidated T. Rowe Price investment products may impact the reader's ability to understand our core operating results.
- (5) This non-GAAP adjustment represents the other non-operating income (loss) and the net gains (losses) earned on our non-consolidated investment portfolio that are not designated as economic hedges of the supplemental savings plan liability, and that are not part of the cash and discretionary investment portfolio. Management retains the investment gains recognized on the non-consolidated cash and discretionary investments as these assets and related income (loss) are considered part of our core operations. Management believes adjusting for these non-operating income (loss) items helps the reader's ability to understand our core operating results and increases comparability to prior years. Additionally, management does not emphasize the impact of the portion of non-operating income (loss) removed when managing and evaluating our performance.
- (6) The income tax impacts were calculated in order to achieve an overall year-to-date non-GAAP effective tax rate of 24.1% for 2022 and 23.5% for 2021. As such, the non-GAAP effective tax rate for three months ended June 30, 2022 and 2021 was 23.9% and 23.4%, respectively. We estimate that our effective tax rate for the full-year 2022 on a non-GAAP basis will be in the range of 23% to 25%.
- (7) This non-GAAP measure was calculated by applying the two-class method to adjusted net income attributable to T. Rowe Price divided by the weighted-average common shares outstanding assuming dilution. The calculation of adjusted net income allocated to common stockholders is as follows:

	Three months ended		Six months ended	
	6/30/2022	6/30/2021	6/30/2022	6/30/2021
Adjusted net income attributable to T. Rowe Price	\$ 417.7	\$ 779.0	\$ 1,034.6	\$ 1,491.0
Less: adjusted net income allocated to outstanding restricted stock and stock unit holders	9.3	21.3	23.3	40.1
Adjusted net income allocated to common stockholders	\$ 408.4	\$ 757.7	\$ 1,011.3	\$ 1,450.9

## **CAPITAL RESOURCES AND LIQUIDITY.**

### **Sources of Liquidity**

We have ample liquidity, including cash and investments in T. Rowe Price products, as follows:

(in millions)	6/30/2022	12/31/2021
Cash and cash equivalents	\$ 2,116.0	\$ 1,523.1
Discretionary investments	491.3	554.1
Total cash and discretionary investments	2,607.3	2,077.2
Redeemable seed capital investments	998.0	1,300.1
Investments used to hedge the supplemental savings plan liability	725.7	881.5
Total cash and investments in T. Rowe Price products	\$ 4,331.0	\$ 4,258.8

Our discretionary investment portfolio is comprised of short duration bond funds, which typically yield higher than money market rates, and asset allocation products. Cash and discretionary investments experienced market losses of \$30.6 million and \$54.4 million in the three- and six- months ended June 30, 2022 compared to investment gains of \$17.8 million and \$31.5 million in the three- and six- months ended June 30, 2021. Our subsidiaries outside the United States hold cash and discretionary investments of \$923.8 million at June 30, 2022 and \$764.2 million at December 31, 2021. Given the availability of our financial resources and cash expected to be generated through future operations, we do not maintain an available external source of additional liquidity.

Our seed capital investments are redeemable, although we generally expect to be invested for several years for the products to build an investment performance history and until unrelated third-party investors substantially reduce our relative ownership percentage.

The cash and investment presentation on the unaudited condensed consolidated balance sheet is based on the accounting treatment for the cash equivalent or investment item. The following table details how T. Rowe Price's interests in cash and investments relate to where they are presented on the unaudited condensed consolidated balance sheet as of June 30, 2022.

(in millions)	Cash and cash equivalents	Investments	Net assets of consolidated T. Rowe Price investment products <sup>(1)</sup>	6/30/2022

As reported on unaudited condensed consolidated balance sheet at June 30, 2022	\$ 2,116.0	\$ 2,563.7	\$ 1,264.1	\$ 5,943.8

<sup>(1)</sup> The consolidated T. Rowe Price investment products are generally those products we provided seed capital at the time of their formation and we have a controlling interest. These products generally represent U.S. mutual funds as well as those funds regulated outside the U.S. The \$34.1 million and the \$665.4 million represent the total value at June 30, 2022 of our interest in the consolidated T. Rowe Price investment products. The total net assets of the T. Rowe Price investment products at June 30, 2022 of \$1,264.1 million includes assets of \$1,307.2 million, less liabilities of \$43.1 million as reflected in our unaudited condensed consolidated balance sheets.

<sup>(2)</sup> Includes \$208.8 million of non-controlling interests in consolidated entities and represents the portion of these investments, held by third parties, that we cannot sell in order to obtain cash for general operations.

Our unaudited condensed consolidated balance sheet reflects the cash and cash equivalents, investments, other assets and liabilities of those T. Rowe Price investment products we consolidate, as well as redeemable non-controlling interests for the portion of these T. Rowe Price investment products that are held by unrelated third-party investors. Although we can redeem our net interest in these T. Rowe Price investment products at any time, we cannot directly access or sell the assets held by the products to obtain cash for general operations. Additionally, the assets of these T. Rowe Price investment products are not available to our general creditors. Our interest in these T. Rowe Price investment products was used as initial seed capital and is recategorized as discretionary when it is determined by management that the seed capital is no longer needed. We assess the discretionary investment products and, when we decide to liquidate our interest, we seek to do so in a way as to not impact the product and, ultimately, the unrelated third-party investors.

### **Uses of Liquidity**

We increased our quarterly recurring dividend per common share in February 2022 by 11.1% to \$1.20 per common share from \$1.08 per common share. Further, we expended \$519.6 million in the first half of 2022 to repurchase 3.8 million shares, or 1.6% of our outstanding common stock, at an average price of \$137.92 per share. These dividends and repurchases were expended using existing cash balances and cash generated from operations. While opportunistic in our approach to stock buybacks, we will generally repurchase our common stock over time to offset the dilution created by our equity-based compensation plans.

Since the end of 2019, we have returned nearly \$6.0 billion to stockholders through stock repurchases, regular quarterly dividends, and a special dividend, as follows:

(in millions)	Recurring dividend	Special dividend	Stock repurchases	Total cash returned to stockholders
2020	\$ 846.0	\$ —	\$ 1,192.2	\$ 2,038.2
2021	1,003.7	699.8	1,136.0	2,839.5
Six months ended 6/30/2022	556.4	—	519.5	1,075.9
<b>Total</b>	<b>\$ 2,406.1</b>	<b>\$ 699.8</b>	<b>\$ 2,847.7</b>	<b>\$ 5,953.6</b>

We anticipate property, equipment, software and other capital expenditures, including internal labor capitalization, for the full-year 2022 to be about \$290 million, of which more than three-quarters is planned for technology initiatives. We expect to fund our anticipated capital expenditures with operating cash flows and other available resources.

## Cash Flows

The following table summarizes the cash flows for the six months ended June 30, 2022 and 2021, that are attributable to T. Rowe Price, our consolidated T. Rowe Price investment products, and the related eliminations required in preparing the statement.

### Operating Activities

Operating activities attributable to T. Rowe Price during the first half of 2022 provided cash flows of \$1,659.8 million as compared to \$2,025.2 million during the first half of 2021. Operating cash flows attributable to T. Rowe Price decreased \$365.4 million, including a \$657.6 million decrease in net income from the first half of 2021 and a decrease in timing differences primarily on the cash settlement of our assets and liabilities of \$348.3 million. These decreases were partially offset by \$658.5 million in higher non-cash adjustments, including unrealized investment gains/losses, depreciation, amortization of acquisition-related assets and retention arrangements, the fair value remeasurement of the contingent consideration liability, stock-based compensation expense, and other noncash items. The non-cash adjustments were primarily driven by \$443.9 million in net investment losses in the first half of 2022 compared with \$184.9 million in net investment gains in the first half of 2021. Additionally, in 2022, we had net proceeds of \$3.9 million from certain investment products that economically hedge our supplemental savings plan liability compared to net proceeds of \$21.9 million in the same period of 2021. Our interim operating cash flows do not include the cash impact of variable compensation that is accrued throughout the year before being substantially paid out in December. The remaining change in reported cash flows from operating activities was attributable to the net change in trading securities held in our consolidated investment products' underlying portfolios.

### Investing Activities

Net cash used in investing activities that are attributable to T. Rowe Price totaled \$1.6 million in the first half of 2022 compared with \$129.8 million of cash provided by investing activities in the 2021 period. During 2022, net proceeds from the sale of certain of our discretionary investments of \$110.2 million were lower compared to \$160.1 million during 2021. We also increased the level of seed capital provided to the T. Rowe Price consolidated investment products by \$69.3 million. We eliminate our seed capital in those T. Rowe Price investment products we consolidate in preparing our unaudited condensed consolidated statement of cash flows. Partially offsetting these decreases were increased property, equipment and software expenditures of \$1.0 million. The remaining \$30.7 million change in reported cash flows from investing activities is related to the net cash removed from our balance sheet from consolidating and deconsolidating investment products.

### Financing Activities

Net cash used in financing activities attributable to T. Rowe Price were \$1,065.3 million in the first half of 2022 compared with \$791.8 million in the 2021 period. During the first half of 2022, we used \$519.6 million to repurchase 3.8 million shares compared to \$308.9 million to repurchase 1.9 million shares in the first half of 2021. During the first half of 2022, there was a \$51.1 million increase in dividends paid in 2022 as a result of the 11.1% increase in our quarterly dividend per share. In addition, \$6.5 million in net distributions to non-controlling interests in consolidated entities increased net cash used in financing activities. The remaining change in reported cash flows from financing activities is primarily attributable to \$65.7 million in net redemptions from redeemable non-controlling interest holders of our consolidated investment products during the first half of 2022 as compared to \$299.1 million in net subscriptions received from redeemable non-controlling interest holders of our consolidated investment products during the first half of 2021.

### **CRITICAL ACCOUNTING POLICIES.**

The preparation of financial statements often requires the selection of specific accounting methods and policies from among several acceptable alternatives. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in our unaudited condensed consolidated balance sheets, the revenues and expenses in our unaudited condensed consolidated statements of income, and the information that is contained in our significant accounting policies and notes to unaudited condensed consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that we include currently in our unaudited condensed consolidated financial statements, significant accounting policies, and notes.

There have been no material changes in the critical accounting policies previously identified in our 2021 Annual Report on Form 10-K.

### **NEWLY-ISSUED BUT NOT YET ADOPTED ACCOUNTING GUIDANCE.**

See Note 1 - The Company and Basis of Preparation note within Item 1. Financial Statements for a discussion of newly issued but not yet adopted accounting guidance.

## **FORWARD-LOOKING INFORMATION.**

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to: our revenues, net income, and earnings per share of common stock; changes in the amount and composition of our assets under management; our expense levels; our tax rate; the timing and expense related to the integration of OHA with and into our business; and our expectations regarding financial markets, future transactions, dividends, stock repurchases, investments, new products and services, capital expenditures, changes in our effective fee rate, the impact of the coronavirus pandemic, and other market conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, included in our Form 10-K Annual Report for 2021. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors, including, among other things: cash inflows and outflows in the U.S. mutual funds, subadvised funds, separately managed accounts, collective investment trusts, and other investment products, performance fees, capital allocation-based income, fluctuations in global financial markets that result in appreciation or depreciation of the assets under our management, our introduction of new mutual funds and investment products, changes in retirement savings trends relative to participant-directed investments and defined contribution plans, and the impact of the coronavirus outbreak. The ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the T. Rowe Price mutual funds and other managed investment products as compared with competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; the impact of changes in interest rates and inflation; competitive conditions in the mutual fund, asset management, and broader financial services sectors; our level of success in implementing our strategy to expand our business, including our establishment of T. Rowe Price Investment Management as a separate registered investment adviser; and our ability to attract and retain key personnel. Our revenues are substantially dependent on fees earned under contracts with the T. Rowe Price funds and could be adversely affected if the independent directors of one or more of the T. Rowe Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements. Non-operating investment income will also fluctuate primarily due to the size of our investments, changes in their market valuations, and any other-than-temporary impairments that may arise or, in the case of our equity method investments, our proportionate share of the investees' net income.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising and promotion expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the U.S. and to further penetrate our distribution channels within the U.S.; the pace and level of spending to support key strategic priorities, including the integration of OHA with and into our business; variations in the level of total compensation expense due to, among other things, bonuses, restricted stock units and other equity grants, other incentive awards, our supplemental savings plan, changes in our employee count and mix, and competitive factors; any goodwill or other asset impairment that may arise; fluctuation in foreign currency exchange rates applicable to the costs of our international operations; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; the timing of the assumption of all third party research payments, unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as fund and product recordkeeping, facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including, but not limited to, effects on costs that we incur and effects on investor interest in T. Rowe Price investment products and investing in general or in particular classes of mutual funds or other investments.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There has been no material change in our market risks from those provided in Item 7A of the Form 10-K Annual Report for 2021.

### Item 4. Controls and Procedures.

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2022. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of June 30, 2022, are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the second quarter of 2022, and has concluded that there was no change during the second quarter of 2022 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

### Item 1. Legal Proceedings.

For information about our legal proceedings, please see our Commitments and Contingencies footnote to our unaudited condensed consolidated financial statements in Part 1. of this Form 10-Q.

### Item 1A. Risk Factors.

There have been no material changes in the information provided in Item 1A of our Form 10-K Annual Report for 2021.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Repurchase activity during the second quarter of 2022 is as follows:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program
April	36,029	\$ 125.64	35,000	13,383,640

<sup>(1)</sup> The firm's Q1 and Q2 2022 operating results include the results of OHA following its acquisition on December 29, 2021.

<sup>(2)</sup> Capital allocation-based income fluctuates period to period as it reflects the adjustment to accrued carried interest for the change in value of the underlying investments. The realization of accrued carried interest occurs over a number of years.

<sup>(3)</sup> The percentage change is not meaningful (n/m).

<sup>(4)</sup> Adjusts the U.S. GAAP basis for the impact of consolidated T. Rowe Price investment products, the impact of market movements on the supplemental savings plan liability and related economic hedges, investment income related to certain other investments, acquisition-related amortization and costs, and certain nonrecurring charges and gains, if any. The firm believes the non-GAAP financial measures provide relevant and meaningful information to investors about its core operating results. See the reconciliation to the comparable U.S. GAAP measures at the end of this earnings release.

<sup>(5)</sup> Assets under management for the 2021 period do not include the acquired fee-basis assets under management related to the OHA acquisition.

## Management Commentary

Rob Sharps, chief executive officer and president, commented, “Global equity markets suffered their biggest quarterly decline since the start of the pandemic, as fears grew that central banks would tip the global economy into recession in their fight against the highest inflation in four decades. The Federal Reserve raised official short-term interest rates at the most aggressive pace since 1994, while the European Central Bank announced plans for its first rate increase in 11 years as cuts in oil and gas imports from Russia pushed up energy prices dramatically. Sharply higher rates took an especially large toll on the stocks of rapidly-growing companies by making future earnings less attractive, sending the tech-heavy Nasdaq Composite down 22.5% in the quarter, while major bond indices were once again down.

“Our net revenues of \$1.5 billion were down 21.6% over the second quarter of 2021 due to the declining markets’ impact on our average assets under management and capital allocation-based income. Diluted U.S. GAAP EPS was \$1.46, while diluted non-GAAP EPS was \$1.79. Expenses, which now include OHA, were down 13% on a U.S. GAAP basis, while on a non-GAAP basis were up 1.7% from the second quarter of 2021. We are committed to continuing our investments in initiatives to drive long-term growth, but we are taking steps to reduce the pace of hiring to slow the rate of expense growth in response to these market conditions. Our balance sheet remains strong with \$2.6 billion of cash and discretionary investments, and we repurchased 1.7 million shares which combined with our regular quarterly dividend returned \$476.6 million to stockholders in the second quarter.

“Delivering outstanding investment performance remains our top priority. While many of our strategies continue to produce strong results, especially over longer time periods, several of our large equity strategies had challenged performance. We have experienced periods of softer performance in the past and we expect our disciplined investment process and focus on fundamentals will deliver the results our clients expect and deserve. Longer-term performance in our target date franchise remains strong.

“We had net outflows of \$14.7 billion which continues to be largely driven by outflows from growth-oriented equity strategies. Second quarter outflows in multi-asset of \$2.1 billion were driven by a client’s model-driven reallocation impacting our risk-based target allocation products, while target date products had net inflows. Fixed income and alternatives also had net inflows for the quarter. We expect net outflows to persist until we see a more constructive equity environment, improved performance in certain strategies, less overall market volatility, and more traction from strategic growth investment.

“We continue to focus on our strategic priorities to position the business for long-term success. Highlights from Q2 include:

- We hired a new chief operating officer who will oversee operations and technology, functions which are essential to enabling our strategic priorities.
- We also hired a new head of environmental, social, and governance (ESG) enablement who will oversee the firm’s corporate ESG positioning, global ESG product development, regulatory engagement, and client reporting.
- We joined the Net Zero Asset Managers Initiative which supports the goal of net zero greenhouse gas emission by 2050 or sooner and demonstrates our commitment to providing investment products for those clients who have net zero ambitions.
- Our individual investor business was ranked number one in customer satisfaction and highest on all seven factors in the J.D. Power 2022 U.S. Self-Directed Investor Satisfaction Study.

“While markets are challenged, I remain confident in our associates’ ability to deliver exceptional value to our global clients. I’d like to thank our associates for their enduring commitment to our clients and to each other.”

## Assets Under Management

During Q2 2022, assets under management (AUM) decreased \$242.1 billion to \$1.31 trillion. Market depreciation, along with net distributions not reinvested, of \$227.4 billion and net cash outflows of \$14.7 billion reduced the firm's AUM during Q2 2022. Clients transferred \$2.9 billion in net assets from the U.S. mutual funds to collective investment trusts and other investment products, of which \$1.6 billion transferred into the retirement date trusts. The components of the change in AUM, by vehicle and asset class, are shown in the tables below.

<sup>(1)</sup> The underlying AUM of the multi-asset portfolios have been aggregated and presented in this category and not reported in the equity and fixed income columns.

<sup>(2)</sup> The alternatives asset class includes strategies authorized to invest more than 50% of its holdings in private credit, leveraged loans, mezzanine, real assets/CRE, structured products, stressed / distressed, non-investment grade CLOs, special situations, or have absolute return as its investment objective. Generally, only those strategies with longer than daily liquidity are included.

<sup>(3)</sup> Includes distributions reinvested and not reinvested.

AUM in the firm's target date retirement products, which are reported as part of the multi-asset column in the table above, were \$327.1 billion at June 30, 2022, compared with \$375.2 billion at March 31, 2022. These portfolios experienced net cash inflows of \$0.5 billion for Q2 2022.

Investors domiciled outside the United States accounted for 9.4% of the firm's AUM at June 30, 2022, 9.7% at March 31, 2022, and 9.9% at December 31, 2021.

The firm provides participant accounting and plan administration for defined contribution retirement plans that invest in the firm's U.S. mutual funds and collective investment trusts, as well as funds managed outside of the firm's

complex. As of June 30, 2022, the firm's assets under administration were \$216 billion, of which \$133 billion were assets we manage.

In recent years, the firm began offering non-discretionary advisory services through model delivery and multi-asset solutions for providers to implement. The firm records the revenue earned on these services in administrative fees. The assets under advisement in these portfolios, predominantly in the United States, were \$7 billion at June 30, 2022.

## Financial Results

**Net revenues** earned in Q2 2022 were \$1.5 billion, a decrease of 21.6% from Q2 2021. Average AUM in Q2 2022 were \$1.41 trillion, a decrease of 11.2% from Q2 2021. The firm did not waive a significant level of money market investment advisory fees in Q2 2022 and does not expect to waive any fees for the remainder of the year. In Q2 2021, the firm voluntarily waived money market investment advisory fees of \$14.3 million.

- Investment advisory revenues earned in Q2 2022 from the firm's U.S. mutual funds were \$876.2 million, a decrease of 20.2% from Q2 2021. Average AUM in these funds decreased 16.2% to \$711.1 billion in Q2 2022 from Q2 2021.
- Investment advisory revenues earned in Q2 2022 from subadvised funds, separate accounts, collective investment trusts and other investment products were \$620.5 million, a decrease of 10.0% from Q2 2021. Average AUM for these products decreased 5.6% to \$696.0 billion in Q2 2022 from Q2 2021. Investment advisory revenues and average AUM in Q2 2022 reflect OHA's revenue and related average AUM.
- The investment advisory fee annualized effective fee rate of 42.7 basis points in Q2 2022 decreased from 43.2 basis points earned in Q1 2022 and 45.2 basis points earned in Q2 2021. In comparison to Q1 2022, the annualized effective fee rate was primarily impacted by transfers to lower fee vehicles and an asset class mix shift due to market volatility, offset slightly by a reduction in money market fee waivers. Further, in comparison to Q2 2021, the annualized effective fee rate was primarily impacted by the July 2021 target date fee reductions, partially offset by a higher-than-average effective fee rate earned on the firm's alternative asset class. Over time, the firm's effective fee rate can be impacted by market or cash flow related shifts among asset and share classes, price changes in existing products, and asset level changes in products with tiered-fee structures.
- Capital allocation-based income in Q2 2022 reduced net revenues by \$126.3 million. Capital allocation-based income will fluctuate quarter-to-quarter as it reflects the adjustment to accrued carried interest for the change in value of the affiliated funds' underlying investments assuming the value was realized as of the end of the period, regardless of whether the funds' underlying investments have been realized. The

realization of accrued carried interest occurs over a number of years. The Q2 2022 amount represents \$113.0 million in market-related reductions of accrued carried interest from investments in affiliated private investment funds and \$13.3 million in non-cash amortization associated with the difference in the closing date fair value and carrying value of investments acquired as part of the OHA acquisition. For a detail of the change in accrued carried interest, which is reported as investments on the condensed consolidated balance sheet, from the end of 2021, including realized carry distributions, see the applicable table at the end of this release.

- Administrative, distribution, and servicing fees in Q2 2022 were \$142.6 million, an increase of 0.4% from Q2 2021. The increase was primarily attributable to higher transfer agent servicing activities provided to the T. Rowe Price mutual funds, partially offset by lower 12b-1 fees earned from certain share classes of the U.S. mutual funds.

**Operating expenses** in Q2 2022 were \$844.4 million, a decrease of 13.1% compared to Q2 2021 and a decrease of 14.3% compared to Q1 2022. On a non-GAAP basis, the firm's operating expenses in Q2 2022 were \$947.3 million, a 1.7% increase over Q2 2021 and a decrease of 8.8% compared to Q1 2022. The firm's non-GAAP operating expenses exclude the impact of the supplemental savings plan, consolidated sponsored products, the remeasurement of the contingent consideration liability, amortization of certain acquisition-related assets, and other acquisition-related costs. The firm's 2022 operating expenses include OHA's operating expenses as a result of the acquisition at the end of 2021. OHA's operating expenses primarily impact compensation expense; technology, occupancy, and facility costs; and general, administrative and other costs.

The increase in the firm's non-GAAP operating expenses compared to the 2021 quarter was primarily attributable to salaries and benefits, the addition of OHA operating expenses, and higher costs related to the ongoing investment in the firm's technology capabilities. These increases were mostly offset by lower distribution and servicing costs and a lower interim bonus accrual. Q2 2022 operating expenses include the accrued carried interest compensation associated with capital allocation-based income. This accrued carried interest compensation is reported in non-controlling interest in the condensed consolidated balance sheet.

- **Compensation and related costs** on a U.S. GAAP basis were \$463.4 million in Q2 2022, a decrease of 23.3%, compared to Q2 2021. Compensation and related costs, excluding the impact of the supplemental savings plan and non-cash amortization of certain acquisition-related retention arrangements, were \$544.6 million in Q2 2022, a decrease of 3.8% compared to Q2 2021. The second quarter of 2022 includes higher salaries and benefits from increased average headcount and inclusion of OHA and a lower interim bonus accrual. The firm employed 7,771 associates at June 30, 2022, an increase of 3.2% from the end of 2021.

- **Distribution and servicing costs** were \$75.7 million in Q2 2022, a decrease of 18.3% from the \$92.7 million recognized in Q2 2021. The decrease was primarily driven from lower average AUM of certain share classes of the U.S. mutual funds and lower AUM-based distribution costs in the firm's international products, including the Japanese Investment Trusts (ITMs) and certain SICAV share classes. These distribution costs are offset entirely in net revenues. For the ITMs and SICAVs, the related revenue is recognized in investment advisory revenues.
- **Advertising and promotion expenses** were \$21.4 million in Q2 2022, an increase of 4.9% from Q2 2021. The increase was primarily driven by an increase in sponsorships and promotion-related costs during the 2022 quarter.
- **Product and recordkeeping related expenses** were \$76.3 million in Q2 2022, an increase of 76.2% from Q2 2021. Substantially all of the increase was driven by the recordkeeping costs incurred as part of the expanded relationship with Fidelity National Information Services, Inc. (FIS) that began in August 2021. These recordkeeping costs are being partially offset by lower compensation expenses related to the approximately 800 associates who transitioned to FIS in August 2021. These compensation expenses are recorded as part of compensation and related costs.
- **Technology, occupancy, and facility costs** were \$134.3 million in Q2 2022, an increase of 12.6% from Q2 2021. The increase was primarily due to the ongoing investment in the firm's technology capabilities, including hosted solution licenses, related depreciation, and increased office facility costs.
- **General, administrative, and other costs** were \$73.3 million in Q2 2022, a decrease of 20.1% compared to the \$91.7 million recognized in Q2 2021. The decrease was primarily related to the favorable impact of the change in fair value of the contingent consideration liability. These decreases were partially offset by \$27.2 million in acquisition-related amortization and other acquisition-related costs. Higher travel, information services, and other nonrecurring administrative costs further offset the decrease in Q2 2022 costs as compared to Q2 2021.

The firm updated its forecasted 2022 non-GAAP operating expenses from a range of 10% to 14% to a range of 4% to 7% to reflect lower market-related expenses and a slower pace of hiring. The addition of OHA's operating expenses, since the acquisition at the end of 2021, is driving most of the 2022 forecasted expense growth. The firm could elect to further adjust its expense growth should unforeseen circumstances arise, including significant market movements.

**Non-operating income (loss).** Non-operating loss was \$279.9 million in Q2 2022, as compared to non-operating income of \$143.9 million in Q2 2021. The firm's consolidated products and the supplemental savings plan hedge portfolio comprised almost 72% of the net losses recognized during Q2 2022. The cash and discretionary investment portfolio also experienced net investment losses of \$30.6 million during Q2 2022. The components of non-operating income (loss) for Q2 2022 and Q2 2021 are included in the tables at the end of this release.

**Income taxes.** The following reconciles the statutory federal income tax rate to the firm's effective tax rate for the second quarter and the first half of 2022 and 2021:

	Three months ended		Six months ended	
	6/30/2022	6/30/2021	6/30/2022	6/30/2021
Statutory U.S. federal income tax rate	21.0 %	21.0 %	21.0 %	21.0 %
State income taxes for current year, net of federal income tax benefits <sup>(1)</sup>	3.9	3.7	3.5	3.7
Net (income) losses attributable to redeemable non-controlling interests <sup>(2)</sup>	2.7	(.1)	1.1	(.3)
Net excess tax benefits from stock-based compensation plans activity	(.5)	(.6)	(.5)	(.9)
Other items	(1.1)	(.5)	(.2)	(.1)
Effective income tax rate	26.0 %	23.5 %	24.9 %	23.4 %

<sup>(1)</sup> State income tax benefits are reflected in the total benefits for net income attributable to redeemable non-controlling interests and stock-based compensation plans activity.

<sup>(2)</sup> Net income attributable to redeemable non-controlling interest represents the portion of earnings held in the firm's consolidated investment products, which are not taxable to the firm despite being included in pre-tax income.

The firm's non-GAAP tax rate primarily adjusts for the impact of the consolidated investment products, including the net income attributable to redeemable non-controlling interests. The firm's non-GAAP effective tax rate was 23.9% for Q2 2022 compared with 23.4% for Q2 2021. The increase in the non-GAAP tax rate compared with Q2 2021 is primarily attributable to the unfavorable impact of a reduction in the discrete tax benefits associated with the settlement of stock-based awards. The majority of the reduction in discrete tax benefits is due to a lower level of option and restricted stock settlements during Q2 2022 as compared to Q2 2021.

The firm estimates that its effective tax rate for the full year 2022, on a U.S. GAAP basis, will be in the range of 23% to 26%.

## Capital Management

T. Rowe Price has ample liquidity, including cash and investments in T. Rowe Price products as follows:

(in millions)	6/30/2022	12/31/2021
Cash and cash equivalents	\$ 2,116.0	\$ 1,523.1
Discretionary investments	491.3	554.1

Investments used to hedge the supplemental savings plan liability	725.7	881.5
Total cash and investments in T. Rowe Price products	\$ 4,331.0	\$ 4,258.8

- The firm's common shares outstanding were 225.7 million at June 30, 2022, compared to 229.2 million at the end of 2021.
- In the first half of 2022, the firm expended \$519.6 million to repurchase 3.8 million shares, or 1.6%, of its outstanding common shares at an average price of \$137.92, including \$199.4 million to repurchase 1.7 million shares during Q2 2022.
- The firm invested \$122.8 million during the first half of 2022 in capitalized facilities and technology. The firm currently expects capital expenditures, including internal labor capitalization, for 2022 to be about \$290 million, of which more than three-quarters is planned for technology initiatives. These expenditures are expected to continue to be funded from the firm's operating resources.

<sup>(6)</sup> The Morningstar Rating™ for funds is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. Morningstar gives its best ratings of 5 or 4 stars to the top 32.5% of all funds (of the 32.5%, 10% get 5 stars and 22.5% get 4 stars). The Overall Morningstar Rating™ is derived from a weighted average of the performance figures associated with a fund's 3, 5, and 10 year (if applicable) Morningstar Rating™ metrics.

## Non-GAAP Information and Reconciliation

The firm believes the non-GAAP financial measures below provide relevant and meaningful information to investors about its core operating results. These measures have been established in order to increase transparency for the purpose of evaluating the firm's core business, for comparing current results with prior period results, and to enable more appropriate comparison with industry peers. However, non-GAAP financial measures should not be considered as a substitute for financial measures calculated in accordance with U.S. GAAP and may be calculated differently by other companies.

The following schedules reconcile U.S. GAAP financial measures to non-GAAP financial measures for the three months ended June 30, 2022 and 2021 and March 31, 2022.

<b>Adjusted Non-GAAP Basis</b>	<u>\$ 1,841.0</u>	<u>\$ 1,917.5</u>	<u>\$ 31.5</u>	<u>\$ 458.0</u>	<u>\$ 1,491.0</u>	<u>\$ 6.32</u>

- (1) These non-GAAP adjustments remove the impact of acquisition-related amortization and costs including amortization of intangible assets, the recurring fair value remeasurements of the contingent consideration liability, amortization of acquired investment and non-controlling interest basis differences and amortization of compensation-related arrangements. Management believes adjusting for these charges helps the reader's ability to understand the firm's core operating results and to increase comparability period to period.
- (2) This non-GAAP adjustment removes the transactions costs incurred related to the acquisition of OHA. Management believes adjusting for these charges helps the reader's ability to understand the firm's core operating results and to increase comparability period to period.
- (3) This non-GAAP adjustment removes the compensation expense impact from market valuation changes in the supplemental savings plan liability and the related net gains (losses) on investments designated as an economic hedge against the related liability. Amounts deferred under the supplemental savings plan are adjusted for appreciation (depreciation) of hypothetical investments chosen by participants. The firm uses T. Rowe Price investment products to economically hedge the exposure to these market movements. Management believes it is useful to offset the non-operating investment income (loss) realized on the economic hedges against the related compensation expense and remove the net impact to help the reader's ability to understand the firm's core operating results and to increase comparability period to period.
- (4) These non-GAAP adjustments remove the impact that the consolidated T. Rowe Price investment products have on the firm's U.S. GAAP consolidated statements of income. Specifically, the firm adds back the operating expenses and subtracts the investment income of the consolidated T. Rowe Price investment products. The adjustment to operating expenses represents the operating expenses of the consolidated products, net of the elimination of related management and administrative fees. The adjustment to net income attributable to T. Rowe Price represents the net income of the consolidated products, net of redeemable non-controlling interests. Management believes the consolidated T. Rowe Price investment products may impact the reader's ability to understand the firm's core operating results.
- (5) This non-GAAP adjustment represents the other non-operating income (loss) and the net gains (losses) earned on the firm's non-consolidated investment portfolio that are not designated as economic hedges of the supplemental savings plan liability, and that are not part of the cash and discretionary investment portfolio. Management retains the investment gains recognized on the non-consolidated cash and discretionary investments as these assets and related income (loss) are considered part of the firm's core operations. Management believes adjusting for these non-operating income (loss) items helps the reader's ability to understand the firm's core operating results and increases comparability to prior years. Additionally, management does not emphasize the impact of the portion of non-operating income (loss) removed when managing and evaluating the firm's performance.
- (6) The income tax impacts were calculated in order to achieve an overall year-to-date non-GAAP effective tax rate of 24.1% for 2022 and 23.5% for 2021. As such, the non-GAAP effective tax rate for three months ended June 30, 2022 and 2021 was 23.9% and 23.4%, respectively. The firm estimates that its effective tax rate for the full-year 2022 on a non-GAAP basis will be in the range of 23% to 25%.

(7) This non-GAAP measure was calculated by applying the two-class method to adjusted net income attributable to T. Rowe Price Group divided by the weighted-average common shares outstanding assuming dilution. The calculation of adjusted net income allocated to common stockholders is as follows:

	Three months ended			Six months ended	
	6/30/2022	6/30/2021	3/31/2022	6/30/2022	6/30/2021
